Fax Number: 402-894-3824  
Street Address: 14507 Frontier Rd  
City: Omaha  
State: NE  
Zip: 68138  
Country: USA  
How would you like us to contact you? email

### Publication Information

Clearly identify the report, data set, or other document that contains the information you want the Department to correct.

DOT Agency: FMCSA

Publication/Report Title: Detailed Crash Report

Publication/Report Title: 07/11/2002

How did you receive the information? If found on a website, please indicate the URL

<http://au.volpe.dot.gov/SafeStat/CrashDetailReport>

Describe how the information in question affects you (i.e., how an alleged error harms you, and/or how the correction will benefit you).

I do not believe the State Report Crash #AZ0000047223 reported by the Arizona Department of Public Safety meets the definition of an accident under 390.5 of the Federal Motor Carrier Safety Administration. The recording of this accident in the SafeStat System may result in an erroneous Accident SEA Value for Werner Enterprises, Inc.

Clearly identify the specific information that you believe needs correction. The report should be deleted from SafeStat as a recordable accident charged against Werner Enterprises, Inc safety record.

Specify, in detail, why you believe the information fails to meet standards of integrity, utility, and objectivity.

This occurrence involved a Commercial Motor Vehicle owned by Werner Enterprises, Inc. which was legally stopped in the emergency non-travel lane of I-17 in the State of AZ and was subsequently sideswipped by another motor vehicle that left the travel lane. Vehicle was subsequently towed as the result of damage, however the Werner vehicle was legally stopped in a non travel lane and therefore this should not be counted as a recordable accident against Werner's safety record.

Specify your recommendations for what corrections DOT should make to the information in question and reasons for believing that these recommended corrections would make the information consistent with both the DOT's and OMB's information quality guidelines.

The accident report should be immediately deleted from SafeStat and appropriate adjustment made to Werner Accident SEA Value for the current reporting period.

In a case where the Department has not designated a report, data set, or document as being subject to these information quality guidelines, and you

believe it should be, you should specify why the information should be subject to the guidelines; and include any documentary evidence you believe is relevant to your request (e.g., comparable data or research results on the same topic).
